WORK EXPERIENCE

AMBIENT-BASED SMART HOME WITH EMOTIONAL INTELLIGENCE *Developer, Intern*

Vellore, IN

- We engineered an AI-powered system that accurately recognizes vocal and facial expressions with an 82% success rate. Systems communicate back to users, analyze users' emotions and transmit data to the central gateway for optimization.
- Developed algorithms and performed data analysis on reviews to identify and present the most relevant information on the improved course accuracy by 50%

LG CLOUD-BASED STREAMING PLATFORM *Executioner (on behalf of the college)*

Vellore, IN

- Results in scalability, reliability, and elasticity. Managed data with webRTC - a centralized transform (Kubernetes engine, other microservices, and deployment strategies are utilized). Using a multi-cloud environment helps me with cost-optimization with 35% and low latency.
- Engineered a web application that enabled users to receive customized recommendations based on individual interests and performance; boosted user engagement by 40%

VELLORE INSTITUTE OF TECHNOLOGY *Developer*

Vellore, IN

- Upgraded web portal from scratch with user experience and interface, minimized reading time by 40% and increased cut-point by 60%. Shifted from on-demand to the cloud.
- Designed a scalable full-stack web application using the MERN stack to support 2,000+ users; mobilized page load time by 50% and Streamlined certificate generator and transmission by creating and implementing a Python-based script; improved results by 40%, delivered using parallel algorithms to compute faster.
